BUTLER, PA.

CONDITIONS OF SALE

The prices in this catalog cancel all previous prices and are subject to change without notice. All orders for stock are subject to prior sale.

GUARANTEE

This is governed by the Pennsylvania Nurserymen's Association Uniform Retail Replacement Agreement which is as follows: "Provided account is paid within thirty days and plants receive reasonable care, we will replace at one-half price of the plants, plus cost of planting, plants planted in the spring that fail to survive the following summer, or if planted in the fall, fail to leaf out the following spring."

Should we not have the same plants in stock, we reserve the right to give credit for an amount equal to one-half the cost of the plants lost, in other plants of your selection.

DELIVERY CHARGE

Certain items in this catalog include all delivery costs prepaid to your home. These items are Mushroom Manure, Scott's Lawn Seed, Turf Builder, Eisler's Humus, Lawn Mowers, Strawberry Plants, etc. Prices on general Nursery Stock does not include delivery.

GUARANTEE OF GENUINENESS

All plant materials are warranted by us to be true to name and in a healthy condition. If any stock proves untrue to variety name or to our description under which sold, we will, upon proper evidence, replace the stock at no cost or refund the full purchase price. We shall in no case be responsible for any sum greater than the original purchase price.

TERMS

To those having established credit, we are pleased to extend our regular thirty-day terms. Orders for C. O. D. shipments must be accompanied by at least one-third of the amount of the order.

COMMENTS

Our nurseries located 7 miles west of Butler, on Route 422, are one of the largest in the state and we cordially invite you to visit them. You can see how we start the tiny little cuttings in our own propagation house and then grow them into mature plants to supply our customers.

We grow over 500 varieties of trees and shrubs all of which must be perfectly hardy to endure our Western Pennsylvania winters. You may come to the nurseries any day except Sunday and select the material that you like and have it dug fresh for you, or if you can't come any other day in the week, you are invited to stroll through them on Sunday for we always welcome visitors.

The quality of the stock furnished by us is far superior to that sold by so many brokers, who call themselves Nurseries, and who rely upon supplying cheap southern grown stock. The cost of growing plants in this climate with our short summer is far more than that of the south and in many cases we simply can't compete when price alone is considered, but we take pride in growing and selling quality plants as has been done by our family since 1870.

We maintain a landscape service and will be happy to plant your property for you. We are not landscape architects but recommend their services to you. If you wish detailed plans for large homes and estates, it is money well spent when you secure the services of a professional landscape architect. If our years of practical experience is of assistance to you, we are always happy to give our advice free.

PERENNIALS

We grow a large number of hardy perennials in our gardens not far from our Garden Shop. The varieties grown have been tried and tested not only for hardiness in our cold climate, but they are selected for their quality. Our plants are generally many times larger than the small seedling plants shipped into our area from mail order firms. We dig our plants fresh daily with a ball of the original soil in which they were grown attached to the roots. Our perennials will transplant without wilting and nearly always without any loss. You may select them in full bloom and take them home along for your garden.

GARDEN HOSE

Larger diameter hose saves watering time.

To apply one inch of water over an area of 1,500 sq. ft. which is the average city lot using a water pressure of 1,500 sq. ft. which is the average city lot using a water pressure of 50 psi with a 50 ft. section of hose would require the following time.

Diameter of Hose	Gal. per minute	Time required
7/16 in. I. D. -----	7.3 -----	2 hr. 8 min.
1/2 in. I. D. -----	10.9 -----	1 hr. 26 min.
5/8 in. I. D. -----	15.1 -----	1 hr. 2 min.
3/4 in. I. D. -----	26.8 -----	35 min.

Save money by saving time with a larger hose.

LARGE SPECIMEN TREES

We have hundreds of large specimen shade trees of various sizes and varieties growing in our own Nurseries in Butler County which are available for the home owner who wishes immediate shade and who does not wish to wait for years in order to enjoy the beauty and comfort of them.

We are prepared to furnish and plant large Maple, Oaks, Sweet Gums, Honeylocust, Lindens, Ginkgos, Dogwood, Ash, Sycamores, Hawthornes, Elms and others. We invite your inspection.

Our price of planting large trees includes the digging of the hole, the cleaning up of the debris from the excavation, delivery and installation of the tree, furnishing of planting compost as required, the pruning, guying and mulching. Trees furnished and planted by us are guaranteed to live for the first year after planting providing they are given reasonable care by the home owner. Trees destroyed by vandalism or by other reasons beyond our control void our guarantee.

MANURE - "MUSHROOM MANURE"

We furnish and deliver Spent Mushroom Manure anywhere within a radius of 150 miles from Butler. The delivered cost is based on the mileage from our plant near West Winfield. Our delivery trucks are large and haul 15 cubic yards per load. A fifteen cubic yard load weighs from 7 to 8 tons. If you wish a smaller quantity than fifteen cubic yards, please send your own truck to our plant at West Winfield, or call your local Nursery, or landscape gardener. Write or call our Butler office for delivered prices.

MANURE: - MUSHROOM MANURE

Mushroom Manure is real stable manure to which has been added 20% of rich top soil and then used to grow one crop of Mushrooms in the huge limestone caverns at West Winfield in Butler County. The heat of fresh manure is gone, but the organic content and fertility of good barnyard manure is retained.

The high organic content, almost five times that of top soil, is quite valuable in loosening heavy soils and increasing the moisture retention value. It is a long time source of mineral elements which are released gradually through decomposition into the soil.

New studies prove that organic plant foods such as Mushroom Manure are absolutely vital in growing crops for human consumption. They claim that vegetables grown without organic elements are almost valueless in supplying the needs of our body.

A two-inch layer of Mushroom Manure mixed with clay excavation soil will produce a good lasting turf. This makes a much lower cost lawn than the hauling in of some low grade so-called top soil. This has been proven over and over again. It will produce a good lasting turf almost weedless.

For use on a vegetable, or flower garden we recommend from two to four inches spaded into the soil. A generous application will supply your garden with ample plant food for a long time. It loosens the soil, retains moisture and promotes growth. For mulching, or placing around any established plants, we recommend from one to two inches. For roses, it should be placed down in the bed on planting and then use some to mulch them every fall for winter protection. As a top-dressing for lawn either in the fall or winter, we recommend from $\frac{1}{4}$ to $\frac{1}{2}$ inch. It is also used by many gardeners to cover newly seeded lawns to keep them from drying out after seeding.

Mushroom Manure lacks the filth, odor and disease spread in ordinary stable manure for it is sterilized before entering the Mushroom growing plant. This process also kills nearly all weed seeds found in ordinary barnyard manures.

ANNUALS

We grow many thousands of beautiful annuals in our own greenhouses similar to those which we furnished and planted at the new Gateway Parking Plaza in Downtown Pittsburgh in the Spring of 1960. These are available at our Garden Shop and Greenhouses during the Spring planting season. Some of the annuals which we have available are: Alyssum, Asters, Celosia, Coleus, Dahlias, Geraniums, Gomphrena, Phlox, Lantana, Lobelias, Marigolds, Morning Glory, Nicotiana, Portulaca, Salvia, Statice, Snapdragons, Verbena, Vinca, Zinnias, and 18 varieties of Petunias. We also have many tropical plants for your indoor planting boxes which are available throughout the entire year.

Information for the Home Gardener:

Japanese Beetle Control and other grubs:

The best time to apply insecticides for control is before May 1st, or in the fall. Do not lime soil within several weeks following or preceding application with the exception of aldrin and dieldrin. All emulsions must be used as sprays. Most of the controls will last from 3 to 5 years, except arsenate of lead which lasts from 7 to 10 years. It takes from 3 to 10 weeks to kill grubs. Insecticides may be mixed with sand, or with organic fertilizers. Insecticides must be watered into the soil immediately after application and children and pets should be kept off until after watering, or after a rain.

NOTE: The above information is supplied by Pennsylvania University, Agricultural Extension Service.

TREE AND SHRUB MAINTENANCE:

- * Plant all trees & shrubs at same depth as they were growing in the Nursery.
- * Mulch all new planting of trees & shrubs with a 3 to 5 in. mulch of Mushroom Manure to conserve the natural supply of water in the soil & keep weeds down.
- * Feed your Roses at 2 to 3 week intervals during the growing season.
- * Bonemeal is ideal fertilizer for bulbs. Use 1 tablespoon-full of bonemeal in each hole.
- * Never cut off the bulb foliage until it has yellowed or withered.
- * Use Scalecide to eliminate the scale insects during the dormant season. They are found on Lilac, Cotoneaster, Euonymus, Magnolias, etc.
- * Broadleaved Evergreens should receive a special acid plant food once a year and never use bonemeal, wood ashes, or lime.
